

April

4 Year Old Class

Mrs. Puia/Mrs. Millroy
Mrs. Horwith/Mrs. Moran

Curriculum Theme: Bugs and Insects

Week 1: Lady Bugs

Letter: Uu
Numbers: 20
Shape: Crescent

Week 2: Life Cycle of Butterflies

Review of Numbers, Colors,
Shapes & Letters
Digraph: Sh

Identify the stages in
transformation of the butterfly

Week 3: Easter

Review of Numbers, Colors,
Shapes & Letters
Digraph: Th

Week 4: Bees

Review of Numbers, Colors,
Shapes & Letters
Digraph: Ch

Identify the importance of bees in our
surrounding environment

Important Dates:

4/1: Lunch Bunch
4/3: Chapel
4/12: Gym, Easter Stay & Play
4/17: Easter Parade & Egg Hunt
4/18-4/22: School Closed
4/24: Library, Lunch Bunch
4/29: Show and Tell – Insect or Spring Item

Parent's Corner

As your children grow and learn to be independent, it is important to begin to teach them their address and phone number. With the numerous possible phone numbers we have (cell, home, work), please choose the one most likely to always be answered to teach your child. This might not always be the home/house phone. As we get closer to the end of the school year, we will be reviewing this information in class.

Hello, Parents,

Let's hope our winter of snow is over and spring will begin! Even though it was cold outside, we were warm enough to grow some plants in the classroom. The students had fun singing songs about plants, making gardens in play dough, planting seeds, and learning the parts of a plant.

As we move into our new topic this month, we will be beginning our unit on Bugs & Insects. During the month we will observe the stages and transformation of butterflies, understand the environmental importance of bees, explore worms and ladybugs. We will have the opportunity to observe live butterflies and release them altogether on Earth Day. We will end the month with a nature walk to observe living and non-living things in our environment.
