

APRIL

Curriculum Theme:

INSECTS

Insects- Specifically pollinators such as Butterflies, Lady Bugs, and Bees, as well as Worms
-Life cycle, appearance, diet
Plus
-How do they help us?

Review of Numbers, Colors, Shapes & Letters

APRIL DATES

4-17 Career Dress Up Day
4-20 Earth Day Event in The Grove. 1pm

As we move into our new topic this month, we will be beginning our unit on insects. We will observe the stages and transformations of butterflies, work to understand the environmental importance of bees, and explore worms and lady bugs and their importance to the ecosystem. We will have the opportunity to observe live butterflies and release them together. The class will be comparing the life cycles humans, animals, and plants throughout this month. We will be discussing the ways we change as people as we grow. One of the fun events we have planned to delve into this topic is a Career Day. On April 17th the students will have the opportunity to dress up as 'what they want to be when they they grow up'. Also coming up on April 20th we will be holding an Earth Day event in the Grove.
